Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/23/07 has been entered.

Information Disclosure Statement

The information disclosure statement filed November 27, 2007 is noted but has not been entered since all of the references cited therein are already of record.

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "first roll axis" and the "second roll axis" as set forth in claim 1 must be shown or the feature canceled from the claim. It is suggested that an axis or centerline be added to the appropriate figures for each of the first and second roll axes.

No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate

prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter.

There is no description of the rear spindle assembly being pivotable about a roll axis, and therefore the second roll axis of claim 1 lacks adequate description in the specification.

The terms "first pivot assembly," "second pivot assembly," and "third pivot assembly" all lack proper antecedent basis in the specification.

See 37 CFR 1.75(d)(1) and MPEP § 608.01(o)

Allowable Subject Matter

Claims 1 and 4-15 are allowable over the prior art of record.

Conclusion

This application is in condition for allowance except for the formal matters noted above with respect to the drawings and the specification.

Accordingly, prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
